

## Rick's Motorsport Electrics takes the pain out of charging your YFZ!

Let Rick's Motorsport Electrics, Inc. solve all your YFZ electrical issues – we've got the answer! Rick's introduces a new charging kit for the YFZ450 that can run with or without lights. The new kit will fit the 2004-2007 models and will double the stock wattage, with an output of 140 watts of power.

Included in the charging system replacement kit are: a custom-designed, high output, stator and a heavy duty modified regulator. These two components are direct plug-in, bolt-on pieces and come with a one year warranty. The kit retails for \$159.95, but is currently **on sale for \$149.95** – just mention this promo!

“Our new design uses a full wave current, allowing all of the electrical power from the stator to be used in the charging system,” says Rick's Motorsport Electrics president Richard Shaw. “Our kit will eliminate all of the headaches that come with the O.E. charging system on these YFZ's.”

Although both pieces are direct replacements, the Rick's kit comes with detailed installation instructions to put customers at ease. The kit also comes with a one year replacement warranty. Please call Rick's Motorsport Electrics at 1-800-521-0277 with any additional questions or to order your YFZ kit.
